Summary

Experienced DevOps professional specializing in managing and optimizing cloud infrastructures and orchestrating Kubernetes deployments across multi-cloud environments. Successfully led initiatives like implementing GitOps workflows with ArgoCD and managed Kubernetes clusters (GKE, EKS, AKS) to enhance system reliability and performance. Looking to leverage advanced technical skills and leadership in DevOps to drive continuous improvement and scalable solutions at the target organization.

EDUCATION

Ahmet Yesevi University
Bachelor of Arts, Computer Science

Aug 2013 - May 2017

EXPERIENCE

BONDEX

DevOps Manager

Sep 2023 - Present

Miami, FL

Led the DevOps team of 6 to manage and optimize web3 infrastructure across multi-cloud environments.

- Architected scalable cloud and on-prem solutions to support the growth of Coino using GCP, AWS, and Azure.
- Implemented GitOps workflows with ArgoCD and maintained CI/CD pipelines using Jenkins, GitLab CI, and Terraform.
- Managed Kubernetes clusters (GKE, EKS, AKS) with Helm charts and Kustomize for application deployments.
- Implemented advanced security protocols, including automated vulnerability scans, regular patching, and real-time threat detection using ELK Stack, Prometheus, and Grafana.
- Established comprehensive observability strategy using OpenTelemetry for distributed tracing and Datadog for monitoring.
- Introduced cost-effective scaling solutions, reducing cloud expenditure by 15% while maintaining performance through GCP cost optimization strategies.
- Provided mentorship to junior engineers, improving team efficiency and promoting a culture of continuous learning.

AIFI

Senior DevOps Consultant

Sep 2021 - Sep 2023

Santa Clara, CA

Designed and implemented infrastructure on GCP, AWS, and Azure to support autonomous shopping systems with focus on GKE clusters.

- Automated infrastructure provisioning with Terraform and implemented GitOps practices using ArgoCD for streamlined deployments.
- Developed CI/CD pipelines using GitLab CI, Jenkins, and GitHub Actions to automate build, test, and deployment processes.
- Configured centralized logging and observability solutions using ELK Stack, OpenTelemetry, Grafana, Datadog, Prometheus, and Sentry.
- Managed production databases including PostgreSQL, Elasticsearch, and ClickHouse with focus on performance optimization and cost efficiency.
- Implemented security best practices, including network segmentation, firewalls, OPA/Gatekeeper policies, and secure communication.
- Provisioned and managed more than 250 On-Prem and Cloud Kubernetes clusters with Helm and Kustomize deployments.
- Implemented blue-green and canary deployment strategies for zero-downtime releases.

OneTech Capital

DevOps Tech Lead

Sep 2020 - Sep 2021

Dubai

Served as key leader and expert on DevOps practices, leading a team of 4 engineers in implementing cloud-native solutions.

- Implemented GitOps workflows with ArgoCD and supported Continuous Integration and Deployment Pipelines across GCP and AWS.
- Managed GKE clusters and implemented Infrastructure as Code using Terraform for consistent and scalable deployments.
- Scheduled, implemented, and automated security compliance patching and updates on Development and QA servers.
- Established disaster recovery strategies and incident response processes, acting as escalation point for critical infrastructure issues.
- Engaged with cross-functional teams in design, development and implementation of enterprise scalable features related to enabling higher developer productivity and environment monitoring.
- Integrated comprehensive observability using Grafana, Prometheus, and implemented distributed tracing with OpenTelemetry.
- Implemented secret management solutions and cloud cost optimization strategies.

Emlak Jet

Site Reliability Engineer

May 2019 - Sep 2020

Istanbul

Configured and managed orchestration tools like Jenkins, TeamCity, ArgoCD, and Rancher for Kubernetes deployments.

- Developed independent web-based tools, microservices, and solutions using cloud-native approaches, improving system scalability and flexibility
- Configured and managed databases including PostgreSQL, MongoDB, Elasticsearch, and Redis with focus on performance tuning.
- Implemented GitOps practices and managed source control including SVN and Git with comprehensive CI/CD workflows.
- Established monitoring and alerting using Grafana, Prometheus, and Datadog for proactive incident management.
- Mentored junior software developers in gaining DevOps experience and implementing SRE practices.
- Collaborated with development teams on infrastructure requirements and interpreted performance metrics for optimization.

Techno Global Solutions

Jan 2018 - May 2019

Managed multi-cloud infrastructure across GCP, AWS, and Azure with Terraform-based Infrastructure as Code.

- Implemented Kubernetes clusters on GKE with Helm and Kustomize for application lifecycle management, enhancing deployment efficiency and scalability
- Established CI/CD pipelines using GitLab CI and Jenkins with GitOps workflows using ArgoCD, improving code integration and deployment speed
- Configured monitoring and observability stack using Grafana, Prometheus, and ELK Stack, enhancing system visibility and proactive issue resolution
- Managed PostgreSQL and Elasticsearch databases in production environments with focus on reliability and performance, ensuring data integrity and optimal access speeds
- Implemented disaster recovery and backup strategies across cloud platforms, safeguarding data and minimizing downtime during incidents

PROJECTS

Cloudhero.es

Jun 2023

- Developed a web application with cloud-native architecture.
- Configured CI-CD with Cloudflare pages and implemented GitOps practices.
- Enabled WAF and comprehensive security monitoring.

Devfound.io

May 2024 - Present

- Developing a side startup to bring talents with companies using AI, deployed on GKE with ArgoCD GitOps workflows.

TECHNICAL SKILLS

- **Languages:** Java, Python, PostgreSQL, MySQL, JavaScript
- **Cloud Platforms:** GCP (5 years), AWS (7 years), Azure (5 years)
- **Orchestrators:** Kubernetes, GKE, OpenShift, Rancher
- **GitOps & Deployment:** ArgoCD, Helm, Kustomize, OPA/Gatekeeper
- **Infrastructure as Code:** Terraform, CloudFormation
- **CI-CD:** GitLab CI, Jenkins, GitHub Actions, Travis CI, Harness CI
- **Monitoring & Observability:** OpenTelemetry, Grafana, Datadog, Prometheus, Sentry, ELK Stack, NewRelic
- **Databases:** PostgreSQL, Elasticsearch, ClickHouse, MySQL, MongoDB, Redis
- **Developer Tools:** Git, Docker, VS Code, Visual Studio
- **Security & Compliance:** Vulnerability Management, Secret Management, Network Security
